Summary

Motivated Software Developer seeking Web Development position in the Bay Area to exercise and improve my full-stack capabilities. Recent graduate from a Silicon Valley based immersive coding program, where I learned to develop industry level web applications in a series of programming languages.

WEB DEVELOPMENT

Game Cellar — *Video Game Ecommerce App*

Technologies Used: Angular, JQuery, Bootstrap, NodeJS, Express, MongoDB

- MEAN stack application where users can create personal profiles and sell games at a price they find fair
- Built entire project from scratch, utilized Angular, JQuery, and Bootstrap for a well designed and responsive application

Threading Salon — *Sample Website for Threading Salon*

Technologies Used: NodeJS, Express, Angular, CSS, Bootstrap

- Freelance web app for Threading Salon built using JavaScript technologies along with Bootstrap and custom CSS

Github Link: [Github.com/skweepz22/threading](https://github.com/skweepz22/threading)

GardKnight Web Application — *Company Website*

Technologies Used: Apache, PHP, Angular, MySQL

- Currently building professional web app for GardKnight Surveillance Systems for advertising purposes as well as customer service & product accessibility
- In charge of UX/UI development using Angular, Bootstrap, CSS, and JQuery

EDUCATION

Coding Dojo, San Jose, CA — *Certificate of Completion (Software Engineering)*

August 2017 - November 2017

Completed 14 week immersive coding program for full-stack development. Developed and deployed industry level applications in a series of programming languages.
