Summary

Motivated Software Developer currently seeking Web Development position in the Bay Area to exercise and improve my full-stack capabilities. Graduated with honors from immersive coding bootcamp in Silicon Valley. Experienced in developing full stack web applications in several programming languages(Python, JavaScript, and Ruby) and deploying over AWS ec2 instances. Passion for continuous learning of new technologies to improve my skills and to deliver extraordinary products.

WEB DEVELOPMENT

Game Cellar— *Video Game E-Commerce App*

Technologies Used: Angular, JQuery, Bootstrap, NodeJS, Express, MongoDB, AWS

- MEAN stack application for retail purposes with a focus in sell and trade of retro video games
- Utilized Angular and JQuery on the front end for UI enhancement and ease of page surfing with angular's front-end routing
- Back end built in Node and Express and utilizing mongoose for handling and manipulating the MongoDB database with full CRUD operations
